

# Plants for Feeding Bees

**Tristram Seidler's presentation at New England Wild Flower Society's 2011 Annual Meeting included a month by month chart of plants in bloom to feed bees.**

When planting your garden, reference this chart to ensure a steady flow of pollinating bees into your garden during the year. Dr. Tristram Seidler presented this year-round feeding chart during his presentation on bees at New England Wild Flower Society's 2011 Annual Meeting.
