

MEGA BEE POLLEN PATTIES

3 ½ lbs Mega Bee

2 ¼ lbs Sugar (white granulated)

1 pint honey

1 pint water

Mix together Mega Bee and sugar. Mix very hot water and honey together first, then slowly add to the Mega Bee and sugar mixture. Only add enough to make a stiff cookie dough consistency, too much and it will be runny. If that happens add more equal parts of Mega Bee and sugar until it is the stiff cookie dough consistency.

Fold a 12 – 14 inch piece of wax paper in half. Put approx. a cup of Mega Bee mixture in the middle. Mash down to spread out to a patty leaving at least an inch around the 3 edges. Make up all of the mixture into patties. Extra patties can be frozen in a large container or zip lock bag. This makes about 12 8 ounce patties. (if frozen, let come to room temp before feeding to bees)

Feed these to the bees about 6 weeks before the first honey flow. Place on top bars of the brood box leaving it in the wax paper. These can also help a new Nuc.
